

APPENDIX

LOCATION OF STAND-BY GENERATORS AND AIR CONDITIONING CONDENSING UNITS IN RESIDENTIAL DISTRICTS

Stand-by generators and air conditioning units may be located within the buildable area between the principal building and the rear, interior side, or corner side lot line and may also project into the required interior side yard and rear yard setbacks if said equipment or shelter is located within 5 feet from the side or rear wall of the principal building. However, under no circumstance may such units be located within 15 feet of the façade of the principal building facing the front lot line nor shall any such units encroach into a required side or rear setback by more than 5 feet. Stand-by generators and air conditioning units must be adequately screened with year-round landscaping material.
